to connect.

About Leecare Solutions

Care. It's in our name and at the very core of what we do. It all began in 1992 when Dr Caroline Lee commenced working as a Nurse Advisor with homes under sanctions or with non-compliances and identified a simple need – to always put people at the centre.

The outcome was Leecare Solutions, an organisation that boasts a rich history of supporting aged care providers to demonstrate and provide the highest standards in aged, residential, retirement living and community care through consulting and technology. Today, our 650+ clients include small independent businesses to larger corporate multi-facility organisations across Australia, New Zealand and Singapore.

What makes us the experts? Over 25 years of experience have given Leecare Solutions the knowledge and insight to become the leaders in the field, with a richness of content only achieved after so many years. Equally as important has been the development of our single platform, single DB, Platinum 5 Suite – an unparalleled clinical, care, lifestyle, operations and financial management software solution specifically created for the aged care and community sector.

Simple, secure and customisable, the Platinum 5 Suite leverages technology to bring you a fully integrated Electronic Health Record (EHR) platform whilst also providing everything you need to manage the business of care. One central location, one database – anywhere, at any time and on any commonly used device. It's that easy.

Proud as we are of our award-winning software, we believe that the ability to deliver exceptional care calls for the human touch as much as technology. Like you, we want life for older persons to be the very best of experiences. Together, we can achieve this goal.

Dr Caroline Lee
Leecare Solutions Founder

“We want to support our clients to be the best they can be, so the older persons they support can experience the best possible quality of life.”

Dr Caroline Lee, CEO and Founder, Leecare Solutions

Absolutely everything you need in a single platform? Yes, it's possible.

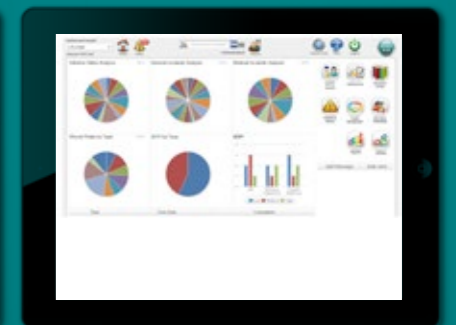

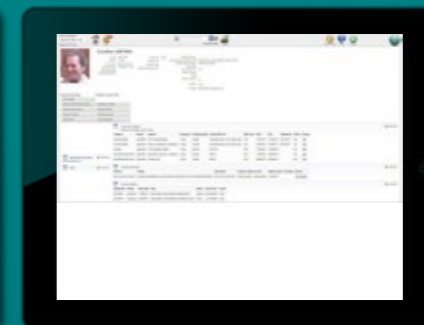

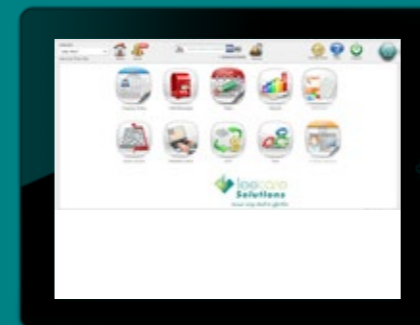

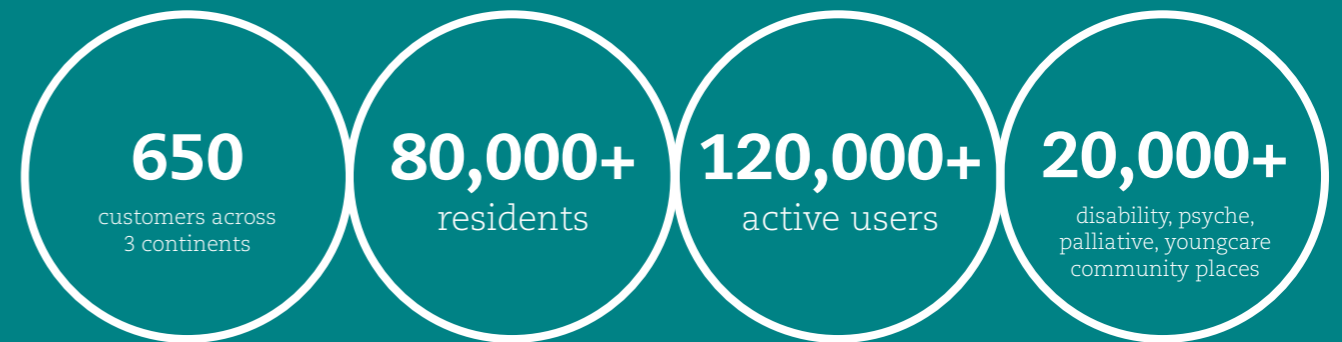

You asked for a simple technology solution, without sacrificing functionality. And we listened. Introducing Leecare Solution's Platinum 5 Software Suite (P5). Built from the ground up with care of the older person, management and staff in mind, P5 is the aged care industry's leading web browser-based system.

Powerful, feature-rich and customisable, P5's Enterprise software is performance enhanced, secure, and offers a range of analysis tools created by our experienced, in-house team of developers. From individualised assessments, care plans and medication management to swift business intelligence analytics, financial and administrative functions - P5 seamlessly integrates to manage all your organisation's clinical, care, social support, business, management and best practice standards requirements.

Together with smarts, P5 also offers simplicity. Here is an intuitive, user-friendly system that's been proven, by staff in over 650 implementations, to streamline and centralise information - ensuring your data is easily available when and where you need it.

Shared knowledge, greater intelligence, faster, better, simpler and smarter technology. This is how Leecare Solutions assists your organisation to deliver the best care in the business. Let our P5 platform support your success.

10 reasons to choose P5

01 A single centralised solution

P5's integrated platform provides care delivery management at your fingertips. Care plans, medication admin, accounting, HR and operational systems are housed in one centralised place, with a single data base. A connected ecosystem to be shared by your entire organisation, profiled at the single service or organisational level - your choice.

02 Easy to use

P5 is all about simplicity. Web browser based, our user-friendly interface is interactive, intuitive and easy to operate for users of all levels. Our dashboards are simple to navigate, with data in an easy to read, insightful format. Software installation is standard and designed to work with your existing hardware and infrastructure. Use any browser, any platform and any device - the choice is entirely yours.

03 Your information in real time

With our P5 system your details are always up to date. From real-time communication among care staff, management, physicians and pharmacists to tracking your residents' changing care needs, your team can connect and function with live insights. Operationally, you can access records, reports, alerts and messages as they occur.

04 Transparency

P5 supports your organisation's operational needs, delivering critical oversight for executives with configurable comprehensive management reporting tools and features. Our business intelligence content and reports provide easy visibility of your organisation's outcomes.

05 Advanced Technology

Our Apps are industry firsts. With point of care data access and entry through click and point Apps, your staff change management is significantly reduced. Use whichever platform suits your organisation. Windows, Linux, Ubuntu, Redhat, it's your choice.

Flexible

P5 is configurable to suit your business, providing you with as much flexibility as you require. Our self-serve tools, forms and reports designer allows your team to customise assessments, care plans, manage access and user groups and make changes to settings and alerts. Our solution works the way you do.

Save time by simplifying

P5 reduces your daily processes and administrative burden. Your care team can document electronically via desktop computers, laptops or mobile devices - viewing a single central record for each resident or client. Staff only document information once with data flowing throughout the program to eliminate duplication. Current and past information, reports and care plans can all be generated in an instant.

Access anywhere, anytime

Your P5 system is mobile and can be used anywhere, enabling you and your team to record or view critical information and access all records, regardless of location. No matter where you need to be or when, P5 provides the information you need, right then and there.

Quality control

P5 equips your team to effectively manage risk and quality control, improving accuracy and reducing errors by eliminating redundant data entry. Robust risk management and incident reporting tools are built directly into the workflow of our platform, enabling you to address critical issues quickly and enforce policies and procedures.

Experience

We were the pioneers and are still the leaders and experts with over 20 years of rich content.

Products

Platinum5

Access to all your data at the point of care

Platinum 5 is the most advanced aged and community care software in the industry.

Features

All about the resident/client

P5 focuses first on the single resident/client view, then collates that data into organisational reporting - staff don't ever have to duplicate records.

Ease of use

P5 has been designed from the ground floor up, utilising open standard technologies, specifically engineered for advanced touch screen devices.

Choice and flexibility

P5 can either be installed on your server network or deployed as a hosted or managed service.

Identify key issues instantly / Clinical intelligence

P5's clinical intelligence dashboard enables instant auto generated reports and alerts to assist monitoring and managing incidents, infections, wounds, weights and vital signs out of reportable ranges.

Enforce policies via automated controls and prompts

Customisable alerts and workflow minimise errors and omissions in a heavily monitored and scrutinised sector.

Clinical and business governance covered

P5's evidence-based tools demonstrate your outcomes and support your organisation during accreditation, certification, support and validation visits.

P5Exec

Governance with ease

Supporting your operations with all management and safety system requirements.

Features

All management and safety systems standards covered

Our configurable system has been designed to reflect the way your organisation manages risk, staff and your business.

Maintenance and inventory, suppliers and assets

P5Exec's comprehensive maintenance system is linked to your organisation's structure, suppliers and assets. Record and track all preventative and corrective maintenance items, monitored against individual assets and suppliers.

Incidents, hazards and risks

P5Exec's Hazards, Incidents and Risks Alerts mechanism links staff to immediate issues so they can be managed in a timely manner and analysed further.

Quality and continuous improvement

Use our QI/CI module to record actions for reported problems, guide discussions in team meetings and loop in the right people via P5 Exec's linked Message and Events/Tasks Centre. All quality reporting requirements are covered.

Document control

Manage all your internal documents, records and reports in an easy to search, manage and profile system.

Credentials and education

Auto links and alerts due credentials and education attendance to user home pages whilst setting up sessions on user calendars and message pages.

P5Med

The right drug, the right dose, the right time – every time

P5Med is a complete medication management system to help staff achieve an error-free administration process.

Features

Safer, efficient, effective care

Seamless, real-time integration of data with P5 prevents adverse events with automated notifications, allergy and key administration information displays.

Fully integrated with MIMS

Our medication administration record ensures medications are accurately prescribed and distributed by physicians or authorised prescribers or pharmacy syncs.

A complete management platform

Includes NRMCM and 9 Rights compliant charts with reviewing and full reporting features.

Creates and maintains accurate records

All administration actions supported for RN's, EN's and carers including double signing, bulk admin and PRN alerting.

Guaranteed adherence to documented policies

P5Med also provides the security necessary to handle the exchange of sensitive data between your organisation and the pharmacy.

P5Mobile

Manage the complete lifecycle of care, anywhere

The P5Mobile App is completely device and location independent - Android, IOS.

Features

Care information at your fingertips

Access daily charts, progress notes, care plans, weights and vitals, incident, wounds and infection forms, picture capture functionality anywhere – enabling care staff to capture and distribute timely, accurate and complete documentation from the bedside.

Operational information as you move around

Record hazards, risks, quality issues and maintenance requests as you walk around using the P5Mobile App.

Better care

Save staff time and allow them to focus on providing personalised care.

On the spot connection

Real-time access to data supports better decisions.

Simple to use

P5Mobile seamlessly integrates with the P5 platform, delivering an enriched user experience.

Automatically updated

Once information has been uploaded onto P5Mobile, it automatically updates in all areas of the P5 platform.

Reflects the organisations' forms always

No matter what changes you make to your form designs, the App will always reflect your form changes without intervention.

Products

P5Finance

Finance connected to your care network

A fully integrated finance solution specifically created for aged and community care organisations.

Features

Accounts Receivable, Accounts Payable, General Ledger, Deposits Wizard, Community Care budgets

The very latest aged care, web-browser based, configurable finance management system available. Includes billing, deposits management, prudential reporting and more, supporting compliance for residential care, retirement villages, community and other services. From tracking bed days via the care system, linking to your configurable chart of accounts/ledgers, P5Finance covers all your financial management needs.

Individualised fees options

Individual resident / client financial profiles linked to previously entered admin / care information, enables client specific charge elements and subsidy amounts to be profiled, invoiced, reconciled and reported.

Subsidies - Medicare, WINZ, insurance, charity

All subsidies - regardless of source - can be apportioned per resident / client, reported on, bulk invoiced, receipted and reconciled against monthly statements.

Trust accounting, personal budgets, petty cash

Fully interfaced to manage petty cash, trusts and budgets.

P5Pharm

Communicate directly with your pharmacist

Designed with simplicity in mind, P5Pharm is a fast and smart way for your facility to always be in contact.

Features

Easy access

Access P5Pharm easily from four different areas of the P5 platform.

Message creation

Create multiple messages with a single session or auto generate messages containing medication and signature details.

Message handling

P5Pharm provides the means for your pharmacist to view all sent and received messages and eliminates the need for phone and fax orders.

Live chat

Staff can access a live chat room to send orders for goods and medications directly to your pharmacist's desktop.

Cost effective

P5Pharm is a cost effective and efficient way to support medication compliance.
